9. Estimated cost of works approximately \$100
10. Estimated time required to construct worksabout a week
11. Remarks This is a little group of springs which are in a close radius of each other and were applied for several years ago by R. A. Yelland as evidenced in your office under application No. 3973. however final proof of beneficial use was never completed, due to the fact that the springs were then on private land owned by another party. however in recent years, through an exchange trade of the land by the government, it is now owned and controlled by the B.L.M. as range land and is covered by Rogers Bros. range allotment, therefore it is the wish and desire of the Rogers Bros. to appropriate the water of these springs and carry out the necessary requirements to establish final proof to same.
